

POWER»»360AMS

Powered by Cityworks®

The solution you need for predictive asset management to operate your utility at peak performance.

POWER360AMS

Powered by Cityworks®

Modern utility leaders need accurate, current, comprehensive and accessible data to manage their facility and the workforce that supports them. To deliver reliable and safe services to customers, and comply with current regulations, leadership and staff need quality information at their fingertips.

POWER360AMS is a powerful platform with robust functionality that can deliver the information you need to make informed asset decisions. This GIS-centric work and asset management solution provides a portal to information throughout the lifecycle of the assets you rely upon for power distribution, transmission and generation. POWER360AMS allows you to collect, store, consolidate and analyze data from multiple systems for:

- ✓ PRE-PROJECT PLANNING
- ✓ NEW CONSTRUCTION
- ✓ PROCUREMENT
- ✓ PREVENTATIVE MAINTENANCE
- ✓ CONDITIONAL ASSESSMENT
- ✓ INSPECTIONS
- ✓ REGULATORY COMPLIANCE
- ✓ OUTAGE RESPONSE
- ✓ VEGETATION MANAGEMENT
- ✓ REPORTING

Using its POWER360Bus technology, the platform integrates with enterprise systems for billing, scheduling, materials management and more. Within it there are templates designed specifically for electric and gas utility assets, eliminating the need for costly customizations.

POWER360AMS models tabular, map, schematic and 3D data in the Esri geodatabase with wide access to graphics and attributes that are scalable. It integrates with multiple Esri ArcGIS applications such as Insights, Collector, Survey123 and more.

POWER360AMS Technology

Access to information wherever you are

Best of all—you can use POWER360AMS on desktop, tablet and mobile applications. From the office to the plant, substation or field locations of your assets, POWER360AMS makes it possible to gather and monitor data where and when you need it, resulting in more efficient work flows and up-to-date information.

“The success of our deployment has been the outstanding user acceptance.”

Janna Weir, Program Manager, Independence Power & Light

Wherever your utility resides on the asset management continuum, from reactive to preventative to predictive, POWER360AMS and POWER’s team of experts can help you move your strategy forward. Our consultants are IAM certified experts who know the utility business and the systems that support the business at utilities.

Let us show you how POWER360AMS can empower your data and decision-making to improve reliability, safety and regulatory compliance at your utility.
